Reasons for Allowance

1. Claims 7, 12, and 14-17 are allowed.
2. The following is an examiner's statement of reasons for allowance: In independent claims 7 and 12, neither Faith nor Kelly discloses, teaches, or fairly suggests setting a jackpot value for one of a plurality of targets based on detecting the aiming direction of the shooting unit.

Faith discloses setting the highest jackpot value for the first (top) bowl (70) which has the smallest diameter and requires the most skill for tossing or flipping in a coin (Figure 2 and Column 2, line 65-Column 3, line 24). Players tend to lose a large number of coins if they always aim for this bowl. Furthermore, players tend to aim and shoot at targets having lower jackpot values since payouts are based upon accumulated values (or points) obtained in the shooting game. The instant invention is defined over the prior art of record because the instant invention varies the degree of difficulty to hit the jackpot value target by setting the jackpot value target in view of the aiming direction of the discharging unit. Thus, aiming for the jackpot value target becomes more appealing to the player since this provides an opportunity to accumulate a higher point total in a shooting game correlating to a higher player payout. This statement is not intended to necessarily state all of the reasons for allowance or all the details why the claims are allowed and should not imply that all the reasons for allowance have been set forth.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
